Apollo DS-X models are designed for standard and ultra-bright, high-nit displays for use in full sun

- All aluminum powder-coated construction for durability and style
- Tempered safety glass with internal IR film reduces solar loading of direct sun on the display
- Engineered with thermostatically controlled and filtered turbo air flow system to protect TVs/displays in high ambient temperatures
- TightSeal™ Technology seals the display against rain, dust and insects
- EZ mount interior TV swing brackets for simplified LCD display installation and easy cable management
- Internal plug bank for TV/display and auxiliary outlet for electronic devices (such as media player, baluns, etc.)
- 9' outdoor rated power cord and watertight cable cover protects power and cable connections to display
- Apollo Heater Module available for extreme cold climates below 0° F (optional)
- Choice of weatherproof mounts available to meet your needs

Apollo Enclosures Pro-X Line

Mounts, Optional Accessories, and Custom Colors

Find complete specifications and pricing at www.apolloenc.com

Custom Designed Dust Covers

Keep your PRO-X enclosure free from dust with this durable 600D polyester weatherproof dustcover with PVC coating. Apollo Dust Covers are custom designed to fit each PRO-X landscape model wall or ceiling mount.

Modesty Frame

Use the Modesty Frame slats for a custom fit appearance when installing a smaller size TV/Display within the range that fit the Apollo Enclosure.

Security Kit

SK100-WM is an anti-theft Security Kit that protects all models that are installed on articulating or flat-wall mounts that tilt. Padlock not included.

All-Weather Mounting Solutions

Apollo provides a full line of durable Dual-arm Articulating, Flat Wall mounts with tilt, and Adjustable Ceiling mounts that are designed for outdoor installation, with weatherproof construction and stainless steel hardware

Designer Custom Colors

Apollo Enclosures are standard in Black (BL). Designer Color Upgrades are also available in: Silver (SL) | White (WH) | Metallic Sandstone (SS) (Allow 3 week lead time for custom colors)

Heater Module

HM200i for 43" - 65"

HM200i-D for 75"- 86"

The Apollo thermostatically-controlled Heater Module is an option available for extreme weather conditions. The Heater Module can be preset to virtually eliminate condensation in high-humidity climates, or Protect your display in extremely cold climates where temperatures dip below -0° F (-20° C.)
